

COMMUNITY ENGAGEMENT POLICY

In addition to delivering innovative, exciting accommodations and outstanding services to all our customers, Cirus Apartments believes it is important to play as a community member, applying its special characteristics to contribute further to society and its local and regional sustainable development.

When a company provides a range of resources to communities, supporting their development and proactively tackling issues, it is, in part, fulfilling its social responsibility as a good corporate citizen. Such actions also benefit the company's own operations, fostering a better business environment and creating new markets that can grow sustainability.

We work with a variety of stakeholders, both governmental and nongovernmental, national, regional and local ones and pooling our respective strengths to address increasingly complex social issues.

Apartments' Approach to Community Engagement

Cirus Apartments have been involving local stakeholders since the start, as we are aware of its importance and support the regional sustainable development, and we will also continue to do so in the future. Therefore we:

- We select and cooperate with local furniture manufacturers,
- we select and cooperate with local safety organizations that take care of the safety of all, both guests and employees (firefighters, police, medical workers and organisations, occupational safety experts, plumbers, electricians, etc.),
- We work with a local architect who designed and planned the interior of the apartments,
- we cooperate with the main regional tourism organization Zavod Kočevsko, which is the leading institution in the field of organization of tourist products and cultural events. In the apartments we offer information on tourism offer, activities, local tourist guides and other tourism-related information. This can be obtained in brochures, leaflets, house books and other related informational documents,
- involve and promote local food and beverage producers.
 - In the Cirus Apartments we offer all the information about local food providers and locations where they can buy and try them and at their request we offer them a breakfast consisting of local ingredients and products,
 - At the request of guests, the refrigerator in the apartment is filled with the desired local delicacies, dishes and drinks.
- we promote local and regional suppliers, producers and others who are offering their goods and services to visitors, tourists and other different interesants and individuals,
- we promote local producers and creators of tourist souvenirs (we provide guests with information about souvenir shops),

- we encourage all local, regional and other suppliers with whom we work to follow sustainable and ecological guidances in all aspects of their process - from idea to production, marketing and selling process.
